Dear Ms. Zach,

Northridge Hospital Medical Center is proud to be identified as a provider of "significantly better than expected" outcomes in the state's RAMO analysis. As our mission indicates, we are a multi-campus organization which is an integral component of the UniHealth San Fernando Valley healthcare system dedicated to providing compassionate, quality, high value healthcare services to residents of our communities. We feel that this type of risk adjusted side-by-side comparison is helpful to the public when making informed decisions about their healthcare providers.

We are dedicated to continually improving the care that we deliver to the members of our community.

Very truly yours,

Jeffrey Plocken, President/CEO
