

**Office of Statewide Health Planning and Development
Request for Offer (RFO) #08-9113
Health Impact Assessments**

**Advance Questions
6/5/08**

The Request for Offer and this written response to contractor questions are the only items on which the bidders should rely in preparing their bids. Bidders should not rely on any oral representations.

- 1. In what format will the hospital data be provided? Will it include the ICD-10 codes?**

Any patient-level data necessary for the health impact assessment can be provided either as a SAS dataset or as a comma separated value (CSV) file, at the contractor's option. Our data is coded in ICD-9, not ICD-10. Facility-level data such as financial and utilization data is provided in Excel or comma separated value (CSV) format.

- 2. How many hospitals are the consultants assessing and where are they located?**

OSHPD cannot predict which, or how many, hospitals will apply for an exemption under the provisions of Health and Safety Code §130061.5, et seq.

- 3. Will data about the surrounding hospitals and demographic data about the community be provided?**

It is expected that the consultant will be able to access all necessary data sources, including any necessary demographic data, to conduct the health impact assessment.

OSHPD will make available its data resources to the consultant; patient level confidential datasets will be provided under a data use agreement and can only be used for the purposes of this study. Confidential datasets must be returned to OSHPD at the conclusion of the work.

Other non-confidential OSHPD data will be available from our website.

- 4. What information is available about the seismic issues? Will a seismic evaluation be provided?**

Information about seismic issues is available on the OSHPD website. A list of SPC-1 buildings, current as of February 2008, is attached to this document.

5. Is travel to the hospital site(s) required? If so, please quantify.

The consultant will be responsible for gathering the information necessary to prepare the health impact assessments on hospitals submitting exemption requests that OSHPD determines to require these assessments.

6. To what extent are the contractors making decisions relating to the retrofit? Are they assessing if the hospital should close or are they assessing if the building should be rebuilt?

Neither--in accordance with Health and Safety Code §130061.5(b)(3)(C)(ii), the contractor will be responsible for preparing an assessment to determine whether “the removal of the building or buildings from service may diminish significantly the availability or accessibility of health care services to an underserved community.”

OSHPD cannot predict what action the hospital may choose to take in light of the results of the health impact assessment. The contractor is not responsible for making decisions about closure, retrofit or reconstruction of any particular hospital but only for assessing the impact of the removal from service of SPC-1 building or buildings.

7. Page 8 of the RFO states that the contractors should include information about seismic issues on the final report. Please define what type of information you are requesting.

This would include, but not be limited to, the hospital’s status regarding its compliance with applicable seismic safety requirements. OSHPD will be relying upon the Contractor to use its expertise to bring forward and evaluate relevant information for the health impact assessment.

8. Can you define the term “community” a bit more. For instance, what radius are you considering—10 mile radius from the hospital or 50-mile radius? Do you want the assessment team to conduct interviews with community members?

The RFO refers to a 10-mile radius to help define the bidding scenarios; this is not a definition included in the law, nor is it a definition of community.

§130061.5(a)(3) states

“It is the intent of the Legislature to ensure the continuation of services in medically underserved communities in which the closure of the hospital would have significant negative impacts on access to health care services in the community.”

As noted in the answer to the previous question, OSHPD will be relying upon the contractor to use its expertise to bring forward and evaluate relevant information for the health impact assessment.

- 9. Are we expected to obtain input from the local community and include that in the analysis? If so, what type/source of community input is required.**

As noted in the answer to the previous question, OSHPD will be relying upon the contractor to use its expertise to bring forward and evaluate relevant information for the health impact assessment.

- 10. Can we email the proposal to arrive no later than 3:00 p.m. on June 19, or is delivery of an original and three printed copies required?**

The bidders' proposals, in both hard copy and electronic formats, are due at OSHPD no later than 3:00 p.m. on June 19, 2008. These must include one electronic copy in Microsoft Word (version 2003 or higher) format or in Adobe Portable Document format (pdf), plus one original printed and signed hardcopy and three photocopies. The electronic copy must be delivered to OSHPD either via email, or on a CD-ROM by 3:00 p.m. on June 19, 2008.

- 11. Please define "One (1) copy on digital media in MS Word (version 2003 or higher)" as noted on page 13 of the Request for Offer. Do you require we provide a copy of the proposal on CD?**

Please see answer to the above question. Both the electronic copy and the printed copies are due to OSHPD by 3:00 p.m. on June 19, 2008. As noted on page 13 of the RFO, Colleen Tschannen is the OSHPD department contact.

- 12. Is the \$495,000 noted in the RFO the maximum anticipated cost of the project assuming the contractor produces a health impact assessment for each of the five scenarios noted in the RFO? Or is the \$495,000 a retainer to cover the costs of an indeterminate amount of assessments (any of which could be in the manner outlined in one of the five scenarios) produced by the contractor?**

The \$495,000 is the maximum allowable cost for services under this contract. It is not a retainer amount. Bids will be scored in part according to the costs proposed by the bidders for the various scenarios described in the RFO. OSHPD will issue a work order to the contractor for each health impact assessment that is required in order to evaluate a particular hospital's request for extension. The applicable scenario in each case will depend upon the nature of the hospital submitting the request. The payment to the contractor will be determined by the number of hospitals requiring health impact assessments for their requests for extension and the applicable scenario for each hospital. We do not expect that any given hospital will require analysis of more than one scenario.

OSHPD cannot at this time anticipate which hospitals will submit a request.

13. Will the OSHPD data be provided to us for free or do we need to purchase the data?

OSHPD data necessary to conduct the analysis will be provided at no charge. However, any nonpublic, confidential data may only be applied to tasks under this contract and must be returned at the completion or termination of the contract.

14. Will we have access to unmasked data or just the public masked data?

Access to the unmasked, nonpublic confidential data will be provided, and the contractor will be asked to sign a confidentiality agreement and to utilize security measures commensurate to those required of researchers accessing OSHPD's confidential data (see attached documents).

15. In Appendix C of the RFO, there is a reference to a 10-mile radius. Are you defining this as the “hospital market” or is the definition of “market” open to the contractor?

The 10-mile radius is simply a geographic radius used to define bidding scenarios.

16. Can you estimate the number of hospitals that will be affected by this RFO?

OSHPD cannot determine how many hospitals will apply for exemptions under Health & Safety Code §130061.5 (SB 306)..

17. The RFO states that the assessment will apply to hospital owners who “do not have the financial capacity” to bring SPC-1 buildings into compliance by 2013...” Attachment A says that the contractor will prepare impact assessments for an unknown number of hospitals that meet criteria in California Health and Safety Code 130061.5(b)(30)(c). Can you confirm that “criteria” here refers to the financial criteria? Will the contractor have any role in determining the “financial capacity” to bring the buildings into compliance or will OSHPD have already determined that the owner does not have the financial capacity to do a timely retrofit when the case comes to the contractor?

The contractor will not be required to apply the financial criteria that are set forth in H&S Code §130061.5(b)(2). This determination will have been made by OSHPD before the case is presented to the contractor. Hospitals that meet the criteria in that section and other sections must also satisfy at least one of the four criteria set forth in §130061.5(b)(3)(c), which OSHPD determines to require the preparation of a health impact assessment.

18. Will possible assessments apply to all SPC-1 nonconforming buildings or just those providing general acute care medical services?

The health impact assessments will apply to the effects of removing from general acute medical care the SPC-1 nonconforming buildings.

- 19. Does OSHPD have a list of hospitals and their SPC-1 buildings and the services these buildings provide, such as general acute care, admin, etc.? Is this available prior to the submission of the proposal?**

A list of SPC-1 nonconforming buildings is attached to this document. The contractor will need to obtain additional details from the hospital.

- 20. Can you confirm that in some cases the OSHPD financial data alone may not be sufficient to determine if the hospital meets the financial criteria for an assessment since the financial data must include data for the “hospital owners and all of its hospital affiliates, considered in total” and there may be cases where the OSHPD data does not include all affiliates of the owner?**

Health & Safety Code §130061.5 provides that OSHPD shall rely on financial data submitted to OSHPD by the hospital:

(2)(A) The office certifies that the hospital owner lacks the financial capacity to meet the requirements of subdivision (a) of Section 130060 for that building. In order to receive the certification, the hospital owner shall file with the office by January 1, 2009, financial information as required by the office. This information shall include a schedule demonstrating that, as of the end of the hospital owner’s most recent fiscal year for which the hospital owner has filed its annual financial data with the office by July 1, 2007, the hospital owner’s annual financial data for that fiscal year show that the hospital owner meets all of the following financial conditions:

- (i) The owner’s net long-term debt to capitalization ratio, as measured by the ratio of net long-term debt to net long-term debt plus equity, was above 60 percent.*
- (ii) The owner’s debt service coverage, as measured by the ratio of net income plus depreciation expense plus interest expense to current maturities on long-term debt plus interest expense, was below 4.5.*
- (iii) The owner’s cash-to-debt ratio, as measured by the ratio of cash plus marketable securities plus limited use cash plus limited use investments to current maturities on long-term debt plus long-term debt, was below 90 percent.*

(B) The office shall certify that a hospital owner applying for relief under this subdivision meets each of these financial conditions. For the purposes of this subdivision, a hospital owner shall be eligible for certification only if the annual financial data required by this paragraph for the hospital owners and all of its hospital affiliates, considered in total, meets all of these financial conditions. For purposes of this section, “hospital affiliate” means any hospital owned by an entity that controls, is

controlled by, or is under the common control of, directly or through intermediate entity, the entity that owns the specified hospital...”

- 21. The duration of the contract is anticipated to be from August 1, 2008 through March 31, 2009. The deadline for hospitals to submit information to OSHPD to be certified for the 2020 replacement date is January 1, 2009. Have some hospitals already submitted the required information to OSHPD for consideration? What is OSHPD’s estimated turnaround time to review hospital submissions for certification, and providing the information to the contractor? If most hospitals submit the information to OSHPD close to the January 1, 2009 deadline and a substantial number of hospitals apply for OSHPD certification, is the March 31st contract deadline flexible or will the contractor need to be prepared to conduct the health impact assessments within a compressed time frame?**

OSHPD estimates that the review process will take no more than approximately two weeks from the date of receipt.

The contractor will need to be prepared to conduct the health impact assessments in a compressed time frame. Note, however, that the submission to OSHPD by the January 1, 2009 deadline is to include the health impact assessment, if required (see Health & Safety Code §130061.5(b)(3)). Accordingly, OSHPD anticipates that requests for extension will be received well prior to the January 1, 2009 deadline. We hope the hospitals submit their application in a timely manner which would allow the contractor to conduct the assessment. OSHPD is aware of the timeframe set out in Health & Safety Code §130061.5 and the possibility that there may be a condensed timeframe to conduct the assessment.

OSHPD will not provide its evaluation package to the contractor. If a health impact assessment is required, OSHPD will issue a work order to the contractor.

- 22. Is it OSHPD’s expectation that local health, emergency services or planning authorities be consulted when preparing the health impact assessments?**

OSHPD expects that the consultant will draw upon the full range of its expertise and the informational resources of which it is aware in order to prepare the health impact assessment.

~ ~ ~ ~ ~

**Questions that were raised during the Contractors' Conference
6/5/08**

- 23. If the expected volume is 20, can we expect that the average scenario would be \$25,000?**

It is up to the bidders to decide how they want to bid on the different scenarios. OSHPD expects that if a hospital needs a health impact assessment, we will meet with the hospital and contractor to review the criteria and estimated cost for the assessment. The hospital will fit into one of the scenarios, so that will be the amount the hospital would pay provided they decide to proceed with the assessment.

- 24. Is this meant to be an exhaustive list of scenarios? What about a situation where two eligible hospitals are in the same market? For instance, the closure of a hospital adjacent to another hospital which also applies.**

Yes, the list of scenarios in the RFO is a comprehensive list. In a situation where two adjacent hospitals apply for the exemption, we would rely upon the contractor to evaluate potential interactions among affected hospitals where “the closure of the hospital would have significant negative impacts on access to health care services in the community.” [Health & Safety Code §130061.5(a) (3).]

- 25. About the security requirements and data use agreement, is there a set turn-around time to provide the data to the contractor? Will you require separate data use agreements for each of the assessments?**

OSHPD will require a single data agreement with the contractor. OSHPD will exercise all due diligence in providing the data to the contractor. Turn around time will be prompt—one week at the most, if we have an executed data use agreement on file.

- 26. At this point, we are not a CMAS contractor. What is your requirement in regards to the status of CMAS contracts?**

You must be a CMAS contractor in good standing at the time of bid submission. A copy of your CMAS contract must be attached to your bid as stated in the RFO; otherwise your bid will be deemed incomplete.

- 27. Interviewing community members will take additional time and money, as opposed to another contractor who does not conduct interviews. Is OSHPD going to weigh the methodology of completing the health impact assessment versus cost associated with the scenarios?**

OSHPD will take into consideration the thoroughness and depth of the bidders' proposed methodology in order to obtain best value, but we are not attempting to

define in this RFO the methodology that the contractor must employ. The RFO lists factors that appear to have relevance for a health impact assessment.

28. If a contractor identifies some additional factors that are not included in Attachment A of the RFO, should they identify those in their bid?

Yes. The methodology proposed for conducting health impact assessments should address those criteria listed in the RFO, but additional criteria may be identified by the contractor in their bid.

29. Will the financial profile be based on revenue and expense statements from the hospital, or are we (contractor) developing that profile? And will the contractor identify what the financial profile will look like?

The contractor will have all the financial information available to them that OSHPD has. The financial information that the hospitals report to OSHPD is based on OSHPD's financial reporting manual, a copy of which will be made available to the contractor. The financial ratios and other items are prescribed by statute, but the "financial profile" in this RFO is not otherwise prescribed.

30. Is there a delineation of what the hospital is required to submit in terms of financial information?

Yes, it is identified in Health and Safety Code §§ 128735 and 128740.

31. Will the hospitals have the latitude to submit their own health impact assessment? And if a hospital conducts a health impact assessment themselves, do you want the contractor to consider it?

Health & Safety Code §130061.5 (b) (3) (C) (ii) states that one of the criteria for eligibility for an extension is that

(ii) The Office determines, by means of a health impact assessment, that the removal of the building or buildings from service may diminish significantly the availability or accessibility of health care services to an underserved community.

OSHPD's contractor will conduct the health impact assessment. The contractor is expected to consider all relevant information in the preparation of this assessment. OSHPD, the contractor and the hospital will meet to review the results of the health impact assessment.

32. Are the hospitals aware of the process?

OSHPD has not, and does not intend to, send specific contact letters to hospitals to advise them of the possibility of an extension to the deadlines described in subdivision (a) or (b) of Health and Safety Code § 130060, pursuant to H&S Code § 130061.5. The hospital should know if they have an SPC-1 building(s) on their campus.

33. OSHPD is going to give out a disk with all the financial information to the contractor. Will the financial information be for all the hospitals, or just the ones that submit?

Financial information for all affected hospitals will be made available to the contractor.

34. What is the process for requesting access to confidential data?

The request forms for confidential data and additional information are attached to this written response to contractors' questions, and the details of this process will be provided shortly after the time of the contract award.

Data Use Agreement**

State of California - Health and Human Services Agency

Office of Statewide Health Planning and Development

AGREEMENT FOR USE OF NONPUBLIC PATIENT LEVEL DATA

OSH-HIRC-390 (Revised 01/15/04)

Request Number:	
Project Name :	

It is the policy of the Office of Statewide Health Planning and Development (OSHPD) to protect the patient's rights of confidentiality as stated in Section 128735 of the Health and Safety Code.

The undersigned requestor, in exchange for receipt of nonpublic patient level data records from OSHPD, agrees to be bound by the statements made in the Request for Nonpublic Patient Level Data and to use these data only as described and for the purpose(s) set forth in the attached request. Any additional use of these data will require additional approval by OSHPD. The undersigned further agrees to provide a secure environment for storage and use of the source data and any working files, to prevent unauthorized access. Except as specified in the attached request, or as later approved, the undersigned agrees not to release, share, or further distribute these discharge data and not to release, share or distribute any data containing complete or partial individual patient records. Any violation of this agreement by the undersigned requestor will be subject to appropriate legal action by the State of California.

The undersigned requestor agrees to indemnify, defend, and hold harmless OSHPD from any or all claims and losses accruing to any person, organization, or other legal entity as a result of violation of this Agreement.

I have read and understand this Agreement and agree to be bound by its conditions, during and subsequent to, any access to OSHPD's nonpublic patient level data.

I fully understand that additional use of these data requires additional approval.

Only those individuals named below will have access to these nonpublic data. I will notify OSHPD immediately of any individuals added to or deleted from the approved access list.

I agree to return the electronic media/hard copy to OSHPD or a Certificate of _____

Attachment 2 OSHDP Data Security Guidelines

To provide a secure working environment for use and storage of source data and all working files of NONPUBLIC PATIENT LEVEL DATA, OSHDP requires that security measures be evaluated before data is stored on a system. The security requirements below are measures which are expected on a secure system. Additional security requirements for specific system types can be found on the following pages. Researchers that do not maintain their own system should validate security requirements with the system security professionals.

Definitions of the types of systems used are:

1. Standalone Computer – a computer with no communications to external systems
2. Networked Computer – a single computer with external communications (such as Internet), and it is not used as a server
3. Host-based system – a computer or terminal that attached to a server where the programs and/or data is maintained on the host computer

The following are found on secured systems:

Software:

- Anti-Virus
- Anti-Spyware (examples of available products include: Adaware™, spybot™, Pest Control™, Giant™, Symantec 9, or Pest Patrol™)
- No remote access software (i.e., PC Anywhere™, Remote Control™, SNMP, etc.)

Access Control:

- Access must be restricted to the authorized individual(s)
- Password length must be a minimum of eight characters for windows based systems
- Passwords should be a mix of alphanumeric characters and symbols
- Passwords cannot be observable (cannot be read when entered) or recordable (cannot be captured in a key logger or other similar device or system), guessable; shared with others, or stored in a readable format

Physical Environment:

- Monitor must be positioned to prevent others from viewing text on screen
- Printers should be placed in close proximity for quick pickup of printouts

- Password protected screen savers must be used when a computer is in a shared workspace

Data Storage:

- Store removable media (CD-ROM, diskette, USB Drive, etc.) in a locked cabinet or drawer
- Data stored on hard drives must be encrypted

Encryption:

- Acceptable encryption standards include Triple-DES; PCP; AES; Windows file encryption system

The following are additional security requirements specific to the type of computer used

1. Stand-alone Computer

Software:

- Anti-Virus and Anti-Spyware scans are required before the CD containing the data is initially accessed

2. Networked Computer

Software:

- Anti-Virus continuous scan
- Anti-Spyware continuous scan
- Security patches must be kept current (i.e., Microsoft Windows™, Internet Explorer, media players, etc.)

Hardware:

- External firewall (such as net gear™, Cisco pix™ or other that is NCSA certified)
- Host Intrusion System (such as Zone Alarm™) Note: Windows™ firewall does not provide adequate security

Network:

- NO WiFi connections

Back-ups:

- Backups of the data are to be restricted to the researcher and authorized staff. The backups of the data should be stored separately from the network backups. No data should be stored with the network backups

Services:

- Disable all unnecessary services
- Peer-to-peer services must be disabled (i.e., Kaaza, edonkey, emule, etc.)

- File sharing must be prevented

Logs:

- Must be maintained for use of data
- Must be maintained for all Read access to data
- Are to be kept for the entire period of authorization for use of data

3. Host-based System

Network:

- Intrusion Detection System
- Firewall
- NO WiFi connections
- Network connections must be isolated and secured

Services:

- Disable all unnecessary services
- Peer-to-peer services must be disabled (i.e., Kaaza, edonkey, emule, etc.)
- File sharing must be prevented

Software:

- Anti-Virus – continuous scan
- Anti-Spyware – continuous scan
- Security Patches must be kept current

Back-ups:

- Backups of the data are to be restricted to the researcher and authorized staff. Ensure that the data is backed up but stored separately from the Host backups. No data should be stored with the Host backups

Logs:

- To be stored on an external system
- Must be maintained for use of data
- Must be maintained for all Read access to data
- Are to be kept for the entire period of authorization to data

Additional Security Guidelines

Acceptable options for data destruction include:

- Use of cross-cut shredder for any hardcopy printouts of any portions of the patient level data
- Shred or break CD-ROM and diskettes into small pieces (disassemble diskette to cut disk into small pieces)
- Use of demagnetizer for magnetic media

In the event of a hard drive failure: if the nonpublic patient level data cannot be removed from a hard drive prior to recovery efforts, a confidentiality agreement must be signed with the recovery services before commencing work.

At the conclusion of the project: secure erasure techniques are to be employed to ensure deletion of patient level data. All temporary files containing patient level data must be deleted and a signed notification, listing the procedure used to ensure permanent deletion of all temporary files, sent to OSHPD.

Disclaimer: software products listed are used as examples only. OSHPD does not endorse any of the software products listed.

Attachment 3 List of SPC-1 Hospital Buildings

Facno	Hospital Name	Building Number	Building Name
10006	Biggs Gridley Memorial Hospital	10	Entry Addition
