State Utilization Data File of Long-term Care Facilities 2004

Introduction

The Office of Statewide Health Planning and Development (OSHPD) annually produces the State Utilization Data File of Long-term Care Facilities. The data come from the individual *Annual Utilization Report of Long-term Care Facilities* that are filed by California's licensed long-term care facilities for the previous calendar year. The data are "as reported" by each facility after complying with input quality control edits. The long-term care utilization data file includes additional data fields populated by information derived from licenses issued by the California Department of Health Services (DHS). Due to occasional time lags between licensing activities, and subsequent updates to the OSHPD's Licensed Facility Information System (LFIS), some fields that are based on licensing data may not provide the most current information (Visit the OSHPD website regarding LFIS: <http://alirts.oshpd.ca.gov/LFIS/LFISHome.aspx> A login is not required for general use). As with many new systems, unanticipated problems and omissions can occur. That means that future sets of the data file may include corrections of data earlier released.

OSHPD welcomes suggestions for improving our data products. Email your suggestions to hircweb@oshpd.ca.gov

New Online Reporting System: ALIRTS

Beginning with 2002 data, facilities began to submit their utilization data to OSHPD through a new, paperless, Internet-based reporting system known as ALIRTS (Automated Licensing Information and Report Tracking System). Once the data are submitted and meet the ALIRTS input quality criteria, the data are accepted and immediately become available to the public via the Internet (<http://alirts.oshpd.state.ca.us>). In addition to the data reported by each licensed facility, ALIRTS also has current and historical facility licensing information. The ALIRTS perspective for both utilization data and licensing data is by individual licensed facility.

OSHPD creates this State Utilization Data File of Long-term Care Facilities after the annual reporting deadline, February 15, arrives for all individual licensed facilities.

New Data File Format

In addition to online reporting, another recent change involves the file type used for the public data file. Rather than displaying the data in a comma-delimited text file, the data file is now configured as a MS Excel file. The Excel software application uses "sections" or "tabs" called **worksheets**. This more efficient file management system permits the display of all the data in addition to any explanatory notes that help the user better understand the data. The data file is contained in four of the five worksheets. In the data worksheets, each row (line) displays all the data from one facility, while each column displays the values for one data field (sequentially, by row and column, from the report form).

Excel was selected because it is the analytical software used by most long-term facility utilization data users. Its file format has become as generic as text file format. Excel was also selected because it can handle multiple worksheets in one file. A note for those data users who do not have Excel: Most analytical software can import Excel worksheets. If the Excel file format is incompatible with your software, contact OSHPD (hirc@oshpd.ca.gov) to obtain individual, comma-delimited text data files.

Description of the Worksheets in the Data File

Tips: This worksheet provides suggestions for more effectively using the data file and general notes pertinent to the facilities reporting data.

Sections 1–4 worksheet

This worksheet reflects the first four sections of the *Annual Utilization Report of Long-term Care Facilities* report form and the data received from facilities that filed (responders). The Office includes an accompanying worksheet entitled, "**NonRespon1-4**" that contains some licensure data from facilities that failed to file their Report. These facilities are referred to as Nonresponders. Please note that some or most fields in the latter worksheet may contain little or no data but are included in the Data File to help users who work extensively with Excel's cut, paste, and import/export functions.

- **Section 1** includes basic facility descriptors, e.g., name and address.
- **Section 2** includes license type and licensee (owner of license) description.
- **Section 3** provides patient census and utilization.
- **Section 4** provides patient demographics.

Section 5 Worksheet

This worksheet reflects the last section of the *Annual Utilization Report of Long-term Care Facilities* report form and the data received from facilities that filed (responders). The Office includes an accompanying worksheet entitled, "**NonRespon5**" that contains some licensure data from facilities that failed to file their Report. These facilities are referred to as Nonresponders. Please note that some or most fields in the latter worksheet may contain little or no data but are included in the Data File to help users who work extensively with Excel's cut, paste, and import/export functions.

State Utilization Data File of Long-term Care Facilities 2004

- **Section 5** provides data on Major Equipment and Capital Expenditures.

The worksheets' default (original) sequence order: The first two columns of the worksheets display the facility's name and OSHPD_ID number. The worksheet lists the facilities in numeric order by OSHPD_ID number (Column A). (Because the county code is in the third and fourth digits, the facilities are also in county order when sorted in numeric order).

Significant Data Field Changes in the State Utilization Data File

For 2004, there were no major data field changes. There is one note for clarification:

- New fields for displaying **future data items** are included in this dataset. Some of these fields remain unpopulated for 2004 but are slated to be filled in future datasets. Users should note that these items are not data reported by the facility itself or provided by the Licensing and Certification Division of DHS. These fields are located between the License Status and County fields.

Traditional and Alternative Header Rows

Header rows provide names for each data field (column). Three alternative header rows are included for the data worksheet (see Figure 2 sample below, copied from a related data file). The first row is the English abbreviation of the data field. The second is the section, line and column reference that can be sorted. The third header row is refers to the section, line and column on the Annual Utilization Report in a more "visual" format. These are simply alternatives for your use. You have the option to use the one (or ones) you like and can delete the others.

Figure 2

The Office recognizes that users of the data have varying preferences regarding header rows. Three header row styles are offered here. For those who prefer English names, the first alternative header row displays English abbreviations.

The **Section+Line+Column** format (row 2) is the next alternative header style. It contains alpha characters and does not include periods. Each field name in this set begins with the letters "slc", followed by 2-digit **section**, 2-digit **line** and 2-digit **column** numbers. For example, the field that is related to the question, "Was this facility in operation at any time during year?" (**Section 1, Line 9, Column 1**), would be field name "slc010901."

If the data in the LTC utilization data worksheet are intended to be imported into other analytical (database) software, be aware that some database applications require at least one alpha

State Utilization Data File of Long-term Care Facilities 2004

character in the field name, while others will not allow “periods.” The alternative field names in the two first rows both meet these naming conventions.

The traditional header approach has been to provide field names that display the report form coordinates. The row directly above the data rows (in both data worksheets) is such a header row. Most field titles in this row (including all facility reported data fields), display their respective report form coordinates from the ALIRTS *Annual Utilization Report of Long-term Care Facilities* report form. The field names display the **Section+Line+Column** numbers, delimited by “dots” (periods). Thus, using the prior example “Was this facility in operation at any time during year?” is reported in Section 1, Line 9, Column 1. This field appears in spreadsheet Column I in the “Sections 1 - 5” worksheet and is displayed as “1.9.1”. This report-form-coordinates format is less complex for display purposes but does require the data user to refer to a copy of the report form when using the data file. A copy of the blank reporting form is provided as Appendix A, located at the end of this documentation file. Printing a hard copy for reference is recommended.
